

## Electric Vehicles

# LEVEL 2 CHARGING BENEFITS

What You Need To Know:

### SAVE MORE TIME

Cut your charging time by as much as 70% when using 220-240volt power instead of 110-120 volts.

### SHARE AND MAKE \$\$\$

You don't need to be the ONLY person using this, make it public on PlugShare and charge others a nominal fee for use.

### DRIVER FURTHER

Because you will be saving time, you'll be able to drive more frequently thus covering more miles/kilometers.

### TRANSITION TO 100% EV

Having access to reasonably quick charging makes driving an EV a greater reality.

### SAVE MORE MONEY

For those who use DC Fast Charging just to get some quick juice, you can now get reasonable charging for a fraction of the cost.
